Experienced Software Engineer, with a passion for problem solving, creating clean code and beautiful products. Interested in all parts of the tech stack, but most experienced with building scalable backend systems in Python, Django, and Postgres.

EXPERIENCE

Software Engineer III, Revel Transit Inc, 68 3rd St., Brooklyn, NY 11231

2020 - onward

- IC on a remote agile team focused on creating tools to help manage our drivers and vehicles day-to-day activities; vehicle assignment, driver payments, on-boarding and off-boarding, at an electric vehicle rideshare company that competes with Uber and Lyft in the NYC area.
- Building within a Python/Django backend and React frontend.
- Regularly designed feature architecture thru team-reviewed RFC.
- Dedicated time to mentoring more junior engineers about team best practices.
- Before we pivoted to rideshare app, we were an electric moped rental company and I was focused on maximizing moped rental revenue and reducing costs.

Software Consultant, Vertical Systems Analysis, 307 West 36th St. 10th Fl., New York, NY

2018 - 2020

- Created a NodeJS + React web app and React Native app iOS App for electronic elevator/escalator inspection, inspector productivity management, violation tracking and form generator
- Working directly with Inspectors, Admins and CFO to design a tool that would fulfill all of the companies needs and integrate with existing tools.

Software Developer, Bookspan, 34 West 27th St. 10th Fl., New York, NY 10001

2015 - 2018

- Created a single NodeJS + React + TypeScript E-commerce web app, that handles 13 different separate web stores, replacing the old Magento web stores, and handled the associated data migration.
- Added features to our CMS and message processing system which interacted with our warehouses. Worked with the product team on designs that maximize customer conversion utilizing our in-house A/B testing.

EDUCATION

Bachelor of Arts (Computer Science) - CUNY - Hunter College

Graduation Date: June 2015

Minor: Mathematics, Spanish

GPA: 3.50

TECHNICAL SKILLS:

- | | | |
|--------------|------------------|--------------------------|
| ● Python | ● Apollo/GraphQL | ● AWS Cloud |
| ● TypeScript | ● React | ● AI Integration |
| ● SQL | ● React Native | ● Continuous Integration |
| ● Ruby | ● Expo | ● Unity Engine |
